## FR8 Projector

The FR-8 is a purpose built microfiche projector reader. It is small, handy, high-performance projector requiring an area of only 170mm. x 240mm. and weighs only 3.9Kg. This projector is equipped for both front and overhead projection, thus dispensing with need for the operator to turn its back to the audience. Simply adjust the projection in order to match various room conditions. FR8 with its F 1:1.4/25mm, 8 element lens allows a bright high-contrast image to be projected, especially from our colour microfiche maps.

With an appropriate projection screen, it becomes possible to write or to mark the projected microfiche image with a marker pen.

This projector can also be used for group briefings.
